WORK EXPERIENCE

Areness Law- Full Stack Developer (SDE-1)

March 2023 – Present

Gurugram, Haryana, India

Achievements/Tasks:

- Implemented robust Administrators/Users management functionality for pages, enhancing system control and security.
- Developed data visualization features to present complex information in a visually appealing and easy-to-understand format.
- Created a streamlined/Bulk insertion system for uploading Excel/CSV files and generating dynamic PDFs, improving document management efficiency.
- Integrated email functionality with email validation to automate the sending of generated PDFs to designated mail addresses, improving communication and workflow.
- Implemented dynamic functionality for sorting links enhancing navigation and user interaction.
- Proficient in web scraping techniques to extract and analyze data for informed decision-making.
- Experienced in seamlessly integrating APIs to enhance application functionality and deliver real-time data solutions

These accomplishments demonstrate my technical expertise and ability to deliver innovative solutions that improve efficiency, enhance user experience, and drive business success.

Role: SDE-1

Responsibilities:

- Solution design
- Task distribution among team members
- Coding and implementation
- Code review and quality assurance

Technologies/Tools used:

- ReactJs for front-end development
- NodeJS for back-end development
- MongoDB, PostgreSQL for database management
- AWS for deployment and hosting

KIPM innovators foundation - Full Stack Developer (Internship)

June 2022 - February 2023

Gorakhpur, Uttar Pradesh, India

Achievements/Tasks:

- Demonstrated a strong command of programming principles across different platforms
- Displayed interest and knowledge in designing interfaces and testing/debugging codes
- Interacted with various IT teams and business units to resolve issues as required
- Adapted quickly in a dynamic environment and delivered on commitments in a timely manner
- Created and maintained technical support documentation and procedures for new technology installations and implementations
- Responsible for various on-demand support tasks for the project

PROJECTS:

SPARS:

- Developed a clone of Google Keep using Map functions of JavaScript, Hooks, and States in

React.js

- Implemented login and registration forms using MongoDB, Express.js, React, and Node.js
- Created separate components for Notes, input area, header, and footer
- Designed an interactive user interface with responsive design and additional functionalities using HTML, CSS, JavaScript, and React.js
